**Other Authorities**

Fed. R. Civ. P. 8..... 7

1 **I. INTRODUCTION**

2 Renaissance’s Motion to Dismiss showed that Plaintiffs’ First Amended  
3 Complaint (“FAC”) was an improper attempt to establish as law Plaintiffs’ views on  
4 how the educational technology (“edtech”) sector should obtain consent to process  
5 student data—an objective Plaintiffs’ center from the first sentence of their  
6 Opposition. *See* Opposition (“Opp.”) at 10.<sup>1</sup>

7 The Opposition (like the FAC) states *political* grievances—but does not show  
8 that Plaintiffs have *legally* stated a single claim. As before, Plaintiffs’ wiretapping  
9 claims fail because Renaissance is a party to the communications, and Plaintiffs fail  
10 to plausibly allege that *their* data was (1) intercepted in transit (2) by third parties or  
11 that (3) it constituted “confidential communications” under CIPA.<sup>2</sup> As to Plaintiffs’  
12 pen register claim, the Opposition asserts a new theory untethered to the FAC which  
13 the Court cannot consider. Plaintiffs also offer no meaningful response to the  
14 deficiencies in their remaining statutory claims under the CDAFA, UCL, and  
15 WDTA.

16 The Wisconsin common-law claims also fail. The Opposition fails to  
17 address—and therefore concedes—Renaissance’s argument that Plaintiffs failed to  
18 state an intrusion upon seclusion claim. Instead, they improperly recast their claim as  
19 one of public disclosure of private facts, which also fails. Plaintiffs’ unjust  
20 enrichment claim fails because they have not identified any mechanism by which  
21 Renaissance monetized their data. Plaintiffs likewise offer scattershot, unavailing  
22 arguments in defense of their novel negligence theory, lacking allegations of  
23 foreseeability, causation, harm, or any basis to conclude that Congress intended  
24 COPPA to be a basis for negligence *per se*.

25 <sup>1</sup> The Opposition’s policy argument that FERPA does not “absolve” Renaissance of  
26 the duty to obtain parental consent is a legally irrelevant distraction, as Renaissance  
27 did not move to dismiss any claim based on FERPA, and the Court need not resolve  
28 whether Renaissance is a “school official” under FERPA to dismiss the FAC.

<sup>2</sup> All terms have the same definitions used in the Motion.

1 For these reasons, the Court should dismiss the FAC with prejudice.

2 **II. ARGUMENT<sup>3</sup>**

3 **A. Plaintiffs Fail to State Any Wiretapping Claims**

4 Plaintiffs' wiretapping theories are shifting and unclear. *First*, they appear to  
5 challenge *Renaissance's* collection of student data, but each of the three cited  
6 wiretapping statutes exempts parties to a communication from liability. Nor does the  
7 crime-tort exception save the ECPA and WESCL claims because Plaintiffs fail to  
8 allege a separate tortious intent.

9 *Second*, Plaintiffs contend that Renaissance aided and abetted *third parties'*  
10 interception of Plaintiffs' communications. However, that theory also fails under all  
11 three statutes because the FAC fails to plead "in transit" interception of Plaintiffs'  
12 communications. Plaintiffs' CIPA claims also fail because (1) Renaissance's service  
13 providers are not "third parties"; and (2) Plaintiffs do not plead "confidential  
14 communications" under Section 632.

15 **1. Renaissance Cannot Intercept Communications with *Itself*,  
16 and the Crime-Tort Exception Does Not Apply**

17 Plaintiffs do not dispute that, as a party to its own communications with  
18 students, Renaissance is exempt from liability under the referenced wiretapping  
19 statutes. Mot. 5; Opp. 13. That is fatal to Plaintiffs' CIPA claim, as Plaintiffs tacitly  
20 concede. *Id.* Plaintiffs attempt, but cannot succeed, to salvage only their ECPA and  
21 WESCL claims by invoking the crime-tort exception. Opp. 13. First, the exception  
22 requires that a party "intercepted the communication for the purpose of a *tortious or*  
23 *criminal act that is independent of the intentional act of recording.*" *Caro v.*  
24 *Weintraub*, 618 F.3d 94, 99 (2d Cir. 2010), cited with approval, *Planned Parenthood*  
25 *Fed'n of Am., Inc. v. Newman*, 51 F.4th 1125, 1136 (9th Cir. 2022). Second, the  
26 defendant's "*primary motivation*" or a "determining factor in the defendant's  
27

28 <sup>3</sup> Unless otherwise noted, all emphasis is added, and all internal citations, quotation  
marks, and alterations are omitted.

actions” must be “to injure plaintiffs tortiously.” *Saedi v. SPD Swiss Precision Diagnostics GmbH*, 2025 WL 1141168, at \*12 (C.D. Cal. Feb. 27, 2025).

Plaintiffs plead neither. The only “tortious intent” they allege is “to tortiously invade [their] privacy” by “disclosing [their data] to third parties for commercial gain.” Opp. 14. But recording “for Defendant’s commercial advantage” is insufficient. *B.K. v. Eisenhower Med. Ctr.*, 2024 WL 2037404, at \*3 (C.D. Cal. Apr. 11, 2024); *see also Lakes v. Ubisoft, Inc.*, 777 F. Supp. 3d 1047, 1057 (N.D. Cal. 2025) (holding collection of data for defendant’s own “economic benefit” insufficient to invoke crime-tort exception). Certainly, Plaintiffs fail to allege that Renaissance acted with the **primary purpose** of committing a tort beyond the challenged collection.

Plaintiffs’ sole case cited in support of the crime-tort exception, *R.C. v. Walgreen Co.*, 733 F. Supp. 3d 876, 901-02 (C.D. Cal. 2024), is inapposite. It concerned independent HIPAA violations, which courts treat differently. *See Lakes*, 777 F. Supp. 3d at 1057-58 (distinguishing *R.C. v. Walgreens* and declining to apply the crime-tort exception in the context of party’s installation of Meta Pixel to collect data, as “the purpose of the interception was not to perpetuate torts on millions of Internet users, but to make money”).

All three wiretapping claims must be dismissed to the extent they are based on Renaissance’s allegedly “intercepting” its own communications.

## **2. Plaintiffs Fail to Plead Third-Party Interception of Communications from Plaintiffs to Renaissance**

### **a. Plaintiffs Fail to Plead “In-Transit” Third-party Interception of Plaintiffs’ Communications**

Plaintiffs fail to allege that Renaissance transmitted **their children’s** communications to third parties while they were **in transit**, defeating all three claims. Mot. 6. Plaintiffs cite only one authority in response: *Q.J v. PowerSchool Holdings, LLC*, 2025 WL 2410472, at \*1, \*8 (N.D. Ill. Aug. 20, 2025). But *PowerSchool* (a non-binding, unpublished, out-of-Circuit decision) did not even **address** whether

1 plaintiffs had alleged “in-transit” interceptions. *Id. Hernandez-Silva v. Instructure,*  
2 *Inc.*, on the other hand, was decided in this District and directly addressed this  
3 question, holding that plaintiffs represented by the same counsel failed to state a  
4 wiretapping claim where (as here) they did not allege “how the technology allows  
5 real-time interception in general or how it was used to intercept Plaintiffs’ data in  
6 particular.” 2025 WL 2233210, \*5 (C.D. Cal. Aug. 4, 2025).<sup>4</sup>

7 Here, as in *Hernandez-Silva*, Plaintiffs do not allege that Renaissance  
8 transmitted ***their data*** in real time to third parties. *See* Mot. 6. They also fail to  
9 address Renaissance’s cited case law dismissing wiretapping claims based on  
10 substantively identical allegations that code embedded in a party’s website  
11 transmitted data in real time. Mot. 6 (citing *Valenzuela v. Keurig Green Mountain,*  
12 *Inc.*, 674 F. Supp. 3d 751, 758 (N.D. Cal. 2023); *Heiting v. Taro Pharms. USA, Inc.*,  
13 709 F. Supp. 3d 1007, 1019 (C.D. Cal. 2023). Because Plaintiffs fail to plead that  
14 “confidential communications by Plaintiffs’ children were intercepted or subject to  
15 eavesdropping by a third party,” *Hernandez-Silva*, 2025 WL 2233210, at \*5, their  
16 wiretapping claims should be dismissed.

17 **b. Plaintiffs’ CIPA Aiding and Abetting Theory Fails**  
18 **Because The “Third Parties” Are Service Providers**  
19 **Not Covered by the Statute**

20 Plaintiffs fail to allege disclosure to third parties under CIPA for the additional  
21 reason that the only “third parties” at issue are vendors providing services to  
22 Renaissance. *See* FAC ¶ 136. As explained in the Motion, under the “extension” test,  
23 a party is not liable for aiding and abetting a vendor who is a mere “***extension*** of” the  
24 party, allowing it “to record and analyze its own data in aid of [its] business,” unless  
25 plaintiffs allege the vendor actually used the data for its own purposes. *Graham v.*  
26 *Noom, Inc.*, 533 F. Supp. 3d 823, 832 (N.D. Cal. 2021). *See* Mot. 7. Although the

27 <sup>4</sup> To the extent Plaintiffs claim that Renaissance intercepted their communications  
28 with third-party websites (rather than the opposite), *e.g.*, FAC ¶¶ 371, 375, the FAC  
contains no supporting factual allegations.

1 FAC concedes that the third parties at issue are Renaissance’s service providers (FAC  
2 ¶ 136), Plaintiffs protest that the Court should apply the “capability” test, which  
3 would permit aiding and abetting liability if the vendor “*is capable* of using  
4 intercepted data for the third party’s own benefit.” Opp. 15 (emphasis in original).  
5 Plaintiffs are incorrect that courts have “broadly rejected” the “extension” test.<sup>5</sup> *Id.*  
6 Although courts are split as they endeavor to apply what Judge Chhabria recently  
7 characterized as “CIPA’s already-obtuse language to new technologies,” *Doe v.*  
8 *Eating Recovery Ctr. LLC*, 2025 WL 2971090, at \*1 (N.D. Cal. Oct. 17, 2025), the  
9 rule of lenity compels the narrower interpretation of CIPA’s reach, *id.* at \*6 (warning  
10 against interpreting “too broadly” CIPA, which “could affect the extent to which . . .  
11 companies are subject to criminal liability”).

12 Even under the capability test, Plaintiffs’ allegations plainly fall short: First,  
13 as explained *supra*, they fail to allege that their data was actually transmitted in real  
14 time to a third party. Second, to the extent they plead service providers’ capability to  
15 use the data, it is pled in conclusory fashion, and upon information and belief. *See,*  
16 *e.g.*, FAC ¶¶ 181 (alleging “[u]pon information and belief” that Mixpanel can use  
17 data for its own purposes), 211 (same for Google). Factual allegations based on  
18 “information and belief” that parrot the elements of a claim are insufficient. *Dallas*

---

19  
20 <sup>5</sup> *See, e.g., Byars v. Hot Topic, Inc.*, 656 F. Supp. 3d 1051, 1067-68 (C.D. Cal. 2023)  
21 (dismissing CIPA claim where plaintiff did not allege “facts to suggest that [third  
22 party] intercepted and used the data itself”); *Williams v. What If Holdings, LLC*, 2022  
23 WL 17869275, at \*3 (N.D. Cal. Dec. 22, 2022) (dismissing CIPA aiding-and-abetting  
24 claim, where there “are no facts here to suggest that [third party] intercepted and used  
25 the data itself”). *Accord Licea v. Am. Eagle Outfitters, Inc.*, 659 F. Supp. 3d 1072,  
26 1083 (C.D. Cal. 2023); *Licea v. Vitacost.com, Inc.*, 683 F. Supp. 3d 1118, 1123-24  
27 (S.D. Cal. 2023); *Cody v. Boscov’s, Inc.*, 658 F. Supp. 3d 779, 782-83 (C.D. Cal.  
28 2023); *Martin v. Sephora USA Inc.*, 2023 WL 2717636, at \*12-13 (E.D. Cal. Mar.  
30, 2023), report and recommendation adopted, 2023 WL 3061957 (E.D. Cal. Apr.  
24, 2023); *Jones v. Peloton Interactive, Inc.*, 720 F. Supp. 3d 940, 946 (S.D. Cal.  
Mar. 12, 2024); *Doe I v. Google LLC*, 741 F. Supp. 3d 828, 843-44 (N.D. Cal. 2024);  
*Johnson v. Blue Nile, Inc.*, 2021 WL 1312771, at \*2 (N.D. Cal. Apr. 8, 2021).

1 & *Lashmi, Inc. v. 7-Eleven, Inc.*, 2015 WL 12734783, at \*2 (C.D. Cal. June 19, 2015).  
2 Plaintiffs thus do not plead a plausible aiding-and-abetting claim under Section  
3 631(a).

4 c. **The Data at Issue Is Not “Confidential**  
5 **Communications” Under CIPA Section 632**

6 Finally, Plaintiffs’ CIPA Section 632 claim fails because they do not  
7 adequately plead that the data allegedly intercepted by third parties constituted  
8 “confidential communications.” Mot. 8. Each of Plaintiffs’ three arguments to the  
9 contrary is unavailing.

10 **First**, Plaintiffs assert that some courts have applied Section 632 to Internet  
11 communications. Opp. 17. But their cited cases are outliers related to high-sensitivity  
12 data (health and credit card information) not at issue in this case about the collection  
13 of routine classroom information. *Id.* Plaintiffs fail to justify an exception to the rule  
14 that Section 632 does not apply in the Internet context. *See* Mot. 8-9; *Moss v.*  
15 *ResortPass Inc.*, 2025 WL 3452360, at \*1-2 (Cal. Sup. Ct. Oct. 30, 2025) (citing  
16 *Eating Recovery Ctr*, 2025 WL 2971090, and holding that “[t]rying to apply [Section  
17 632], originally enacted long before the internet activities described in the FAC were  
18 invented, is nothing more than attempting to force a square peg into a round hole”).  
19 Plaintiffs’ reliance on *A.B. by & Through Turner v. Google*, 737 F. Supp. 3d 869,  
20 884 (N.D. Cal. 2024), *see* Opp. 17, is similarly misplaced, as there was no CIPA  
21 claim at issue.

22 **Second**, Plaintiffs disagree with Renaissance’s argument that students have a  
23 reduced legal expectation of privacy in school, but their only supporting citation,  
24 *Cherkin*, did not involve a Section 632 claim and thus did not construe CIPA’s  
25 “confidential communications” element. *Cherkin v. Powerschool Holdings, Inc.*,  
26 2025 WL 844378, at \*5 (N.D. Cal. 2025).

27 **Third**, Plaintiffs argue generally that Internet users have a reasonable  
28 expectation of privacy in their text-based communications, Opp. 17-18, but this does

1 not transform their communications with Renaissance into “confidential  
2 communications” under CIPA, particularly where Plaintiffs themselves allege that  
3 Renaissance publicly discloses its use of third-party service providers. FAC ¶¶ 108-  
4 151. *See People v. Nakai*, 183 Cal. App. 4th 499, 518 (2010) (dismissing Section 632  
5 claim based on Yahoo! Chat messages because (1) publicly-posted Yahoo! policies  
6 disclosed that users’ chats could be shared and (2) “[c]omputers that are connected  
7 to the internet are capable of instantaneously sending writings and photographs to  
8 thousands of people”). Here too, students had no reasonable expectation of privacy  
9 in the information they disclosed on school-issued devices—particularly where the  
10 FAC concedes their awareness of Renaissance’s disclosures that it could share such  
11 information. Section 632 does not apply.

## 12 **B. Plaintiffs’ “Pen Register” Claim Fails**

13 Plaintiffs claim that Renaissance’s products are a pen register prohibited under  
14 CIPA. *See* FAC ¶¶ 394-407. Their Opposition asserts that the Motion does not  
15 account for the scope of data allegedly collected by Renaissance. *See* Opp. 19.  
16 Plaintiffs’ arguments fail.

### 17 **1. Pleading Deficiencies Compel Dismissal**

18 Plaintiffs assert the FAC alleges Renaissance collected both their IP address  
19 information and a range of other “Device Metadata.” *See* Opp. 19; *see also* FAC ¶  
20 399. Plaintiffs’ Opposition appears to argue that “Device Metadata” refers to a  
21 separate, enumerated list of data elements found 50 pages earlier in the FAC. *See*  
22 Opp. 19 n.7 (citing FAC ¶¶ 86-87, 90).

23 This is not a fair reading of Plaintiffs’ pleading. As Renaissance’s Motion  
24 explained, Plaintiffs used the phrase “Device Metadata” *once* in their 93-page  
25 FAC—to explain the basis for their pen register claim. The FAC did not link this  
26 phrase to any other allegations, let alone cross-reference the lists of data elements on  
27 which Plaintiffs now rely. *See* FAC ¶¶ 81, 86. Federal Rule of Civil Procedure 8  
28 requires more—specifically, “sufficient allegations of underlying facts to give fair

1 notice and to enable [defendant] to defend itself effectively.” *Starr v. Baca*, 652 F.  
2 3d 1202, 1216 (9th Cir. 2011). The FAC does not meet this standard, warranting  
3 dismissal of Plaintiffs’ pen register claim.

## 4                   **2. Inconsistent Theories of Pen Register Violation**

5           Even if Rule 8 did not compel dismissal (it does), Plaintiffs’ two inconsistent,  
6 meritless theories still fail to state a pen register claim. **First**, the FAC alleges  
7 Renaissance’s products are pen registers because they collect user IP addresses and  
8 metadata. *See, e.g.*, FAC ¶ 399. **Second**, Plaintiffs’ Opposition asserts Renaissance  
9 collected substantive data from users which render Renaissance’s products pen  
10 registers. *See* Opp. 19. Both theories fail to meet the elements of a pen register claim,  
11 and the second is not even adequately alleged in the FAC, so the Court cannot  
12 properly consider it.<sup>6</sup> Renaissance addresses it here in an abundance of caution.

13           Put plainly, Plaintiffs’ two theories of pen register violation cannot co-exist  
14 and necessarily fail. On one hand, “If Defendant only collects information regarding  
15 the ‘metadata’ of the communication, Plaintiff[s]’ right to privacy is not invaded  
16 because [they] ha[ve] no expectation of privacy as to that type of data (e.g., [their] IP  
17 address or general geographic location).” *See Mitchener v. CuriosityStream, Inc.*,  
18 2025 WL 2272413, at \*5 (N.D. Cal. Aug. 6, 2025) (dismissing as to substantively  
19 identical CIPA “trap and trace” claim). On the other hand, “[i]f Defendant instead  
20 collects content information from communication between the parties,” like the  
21 additional data elements described in Plaintiffs’ Opposition, then Renaissance’s  
22 products are not pen register devices and “[Section] 638.50 does not apply.” *Id.*

23           IP Address & Metadata. As above, the FAC pleads that Renaissance’s products  
24 are pen registers because they collect IP addresses and metadata from users.

---

27 <sup>6</sup> *See Schneider v. Cal. Dep’t of Corr.*, 151 F. 3d 1194, 1197 n.1 (9th Cir. 1998)  
28 (“[C]ourt[s] **may not** look beyond the complaint” to plaintiff’s opposition when  
assessing the adequacy of allegations on a dismissal motion (emphasis in original)).

1 However, Plaintiffs’ lack of cognizable privacy interest in such information defeats  
2 standing.

3 As to Plaintiffs’ allegations about collecting users’ IP addresses and metadata,  
4 FAC ¶ 399, this data—even including “the connections between them”—is not the  
5 type of information over which web users have a cognizable privacy interest  
6 sufficient to confer standing.<sup>7</sup> See *Rodriguez v. Culligan Int’l Co.*, 2025 WL  
7 3064113, at \*3 (S.D. Cal. Nov. 3, 2025); see also *I.C. v. Zynga, Inc.*, 600 F. Supp. 3d  
8 1034, 1049 (N.D. Cal. 2022) (no privacy interest in data “designed to be exchanged  
9 to facilitate communication,” *i.e.*, username); *Mitchener*, 2025 WL 2272413, at \*5  
10 (no privacy interest in communications “metadata”); Mot. 10-11 (collecting cases  
11 finding no privacy interest in IP address information). Plaintiffs lack Article III  
12 standing to pursue a pen register claim based on the alleged collection of this  
13 information since its purported collection and disclosure would not have been  
14 actionable at common law as a privacy tort. See *Popa v. Microsoft Corp.*, 153 F.4th  
15 784, 791 (9th Cir. 2025) (affirming dismissal on Article III standing grounds where  
16 plaintiff did not explain how data collection caused a harm similar to those common  
17 law privacy torts were designed to remedy).<sup>8</sup>

---

18  
19 <sup>7</sup> Plaintiffs argue the Ninth Circuit recognizes “an expectation of privacy in IP  
20 addresses and cookie identifiers” used to create “highly personalized profiles” about  
21 users, relying principally on *In re Facebook Inc. Internet Tracking Litigation* for this  
22 proposition. See Opp. at 19. But that case concerned the collection of general Internet  
23 browsing information—even when plaintiffs were signed out of Facebook—“no  
24 matter how sensitive” the information collected happened to be. See *In re Facebook*  
25 *Internet Tracking Litig.*, 956 F. 3d 589, 598-99 (9th Cir. 2020). By contrast, the data  
collection alleged here occurred only while Plaintiffs were using Renaissance’s  
products and was not unbounded.

26 <sup>8</sup> Plaintiffs attempt to distinguish *Popa* on the grounds that Renaissance in fact  
27 collects sensitive information about users, like their “academic information” and their  
28 “social-behavioral characteristics,” which could comprise a privacy tort. See Opp.  
21. But if the Court credits these allegations, then Plaintiffs’ pen register claim fails  
because it alleges collection of content information, as described *infra*.

1 Thus, Plaintiffs’ IP address and metadata theory of pen register violation fails  
2 for lack of standing.

3 Contents of Communications. If, however, the Court construes Plaintiffs’ pen  
4 register claim as described in their Opposition (but not the FAC), Plaintiffs’ claim  
5 still fails because CIPA’s pen register provisions do not apply to the challenged data.

6 CIPA Section 638.50 defines a “pen register” as “a device or process that  
7 records or decodes dialing, routing, addressing, or signaling information transmitted  
8 by an instrument or facility from which a wire or electronic communication is  
9 transmitted, but ***not the contents of a communication.***” Cal. Penal Code § 638.50(b).  
10 In other words, pen register devices collect information that *identifies* a  
11 communication, not its ***contents***.

12 To circumvent the Article III issue, Plaintiffs’ Opposition construes, for the  
13 first time, unrelated allegations in the FAC as supporting their pen register claim. *See*  
14 *Opp.* 19-21. Among these are allegations that Renaissance collects data including  
15 “[k]eywords,” “general browsing information,” the “amount of time a student spends  
16 on particular pages,” and “how often a student accesses certain features,” FAC ¶ 86,  
17 as well as “grade level, attendance, [and] lunch balance.” *Id.* ¶ 81. Such information  
18 about user behavior cannot be fairly characterized as non-content information  
19 intended only to identify the recipients of a communication. And “[a]ny [user]  
20 ‘fingerprint’” derived from such information which “reveals biographical  
21 information” about Plaintiffs is similarly “the content” of Plaintiffs’ communications  
22 and cannot form the basis of a pen register claim. *See Kishnani v. Royal Caribbean*  
23 *Cruises Ltd.*, 2025 WL 1745726, at \*4 (N.D. Cal. June 24, 2025) (concluding  
24 similarly as to a substantively identical CIPA “trap and trace” claim); *Mitchener*,  
25 2025 WL 2272413 at \*5 (same).

26 Thus, Plaintiffs’ alternative theory of pen register violation fails because it  
27 asserts harm outside the scope of the statute.

28

1           **C. Plaintiffs' CDAFA Claim Fails**

2           The California legislature enacted the CDAFA as an “anti-hacking statute.”  
3           *Custom Package Supply, Inc. v. Phillips*, 2015 WL 8334793, at \*3 (C.D. Cal. Dec.  
4           7, 2015). Yet, Plaintiffs’ theory of CDAFA violation is inconsistent with the caselaw  
5           and untethered from this legislative purpose.

6           No Statutory Standing. Plaintiffs lack statutory standing to bring their CDAFA  
7           claim. CDAFA claims require a showing of “damage or loss,” Cal. Penal Code §  
8           502(e)(1), which the “majority of courts” interpret to mean “some damage to the  
9           computer system, network, program, or data contained on [plaintiff’s] computer[.]”  
10          *Heiting v. Taro Pharms. USA, Inc.*, 709 F. Supp. 3d 1007, 1020-21 (C.D. Cal. 2023).  
11          The FAC pleads no such damage. *See* Mot. 15. This deficiency reveals the mismatch  
12          between the “computer crime[s]” the statute was meant to deter, Cal. Penal Code §  
13          502(a), and the FAC, requiring dismissal.

14          Plaintiffs’ three counter arguments are unavailing. **First**, Plaintiffs cite  
15          *Cherkin* to argue that “the plain language of CDAFA’s ‘damage or loss’ requirement  
16          contains no such limitation.” Opp. 23. Plaintiffs do not articulate what limitation is  
17          supposedly at issue, but if they invoke *Cherkin* to argue they have CDAFA standing  
18          because their intangible privacy interests were invaded through the alleged misuse of  
19          their personal information, this represents the minority view. This Court should not  
20          endorse that view because it incorrectly assumes “that a loss of control over personal  
21          data” is a type of “injury . . . contemplated by the [statute],” which in fact  
22          “contemplates some damage to the computer system, network, program, or data  
23          contained on that computer, as opposed to data generated by a plaintiff while  
24          engaging with a defendant’s website.” *Heiting*, 709 F. Supp. 3d at 1021.

25          **Second**, Plaintiffs contend they have standing because they did not “receive[.]  
26          a share of the unjust profits generated from their data.” Opp. 23. This argument is  
27          unavailing and conclusory. For instance, Plaintiffs do not (and cannot) allege that  
28          Renaissance sold their information to data brokers or used it to advertise.

1           **Third**, Plaintiffs assert they “plead economic loss” by alleging (i) Renaissance  
2 did not pay them for their data, (ii) Renaissance caused their data to diminish in value,  
3 or (iii) both. Opp. 23. Plaintiffs’ first theory (of nonpayment) overlaps with their prior  
4 argument and fails for the same reason. And Plaintiffs’ diminution of value theory is  
5 not cognizable because it is based on a harm CDAFA does not remedy. *See, e.g.,*  
6 *Cottle v. Plaid Inc.*, 536 F. Supp. 3d 461, 488 (N.D. Cal. 2021) (no CDAFA standing  
7 based on “loss of the value of [plaintiffs’] data”); *see also Doe v. Cnty. of Santa*  
8 *Clara*, 2024 WL 3346257, at \*9 n.7 (N.D. Cal. July 8, 2024) (where, as here,  
9 “plaintiffs allege that their privacy has been invaded because of the disclosure of”  
10 particularly sensitive information, “plaintiffs cannot base their CDAFA damages on  
11 a theory that they lost a benefit to sell that data themselves”).

12           Failure to Plead Required Elements. Even if Plaintiffs had standing (they do  
13 not), they would still have failed to plead a claim under CDAFA section 502(c)(2),  
14 which proscribes “[k]nowingly access[ing] and without permission tak[ing],  
15 copy[ing], or mak[ing] use of any data from a computer, computer system, or  
16 computer network[.]”

17           To begin, Plaintiffs are mistaken that they “need **only** show that [defendants’]  
18 ‘access’ was knowing” to state their claim. Opp. 24. This reading ignores the rest of  
19 the statutory text and flouts Supreme Court and Ninth Circuit precedent counseling  
20 that “knowingly” in section 502(c)(2) also modifies “without permission.” *Cf. United*  
21 *States v. Olson*, 856 F. 3d 1216, 1218 (9th Cir. 2017) (“Courts ordinarily read a  
22 phrase in a criminal statute that introduces the elements of a crime with the word  
23 ‘knowingly’ as applying that word to each element”) (quoting *Flores-Figueroa v.*  
24 *United States*, 556 U.S. 646, 652 (2009)); *see also Facebook, Inc. v. Power Ventures,*  
25 *Inc.*, 844 F.3d 1058, 1069-70 (9th Cir. 2016) (endorsing this view by finding a  
26 CDAFA violation where defendant accessed plaintiff’s computers after receiving a  
27 cease-and-desist letter because only then did defendant “kn[o]w that it no longer had  
28 permission” to do so).

1 Plaintiffs do not (and cannot) refute this authority. Instead, they point to two  
2 federal district court cases for the proposition that “knowingly” modifies only  
3 “accessing” and not “without permission.” *See* Opp. 24. But these cases conclude  
4 that “knowing access” is required to state a claim under section 502(c)(2) **without**  
5 addressing whether and how “knowingly” modifies “without permission.” *See Biden*  
6 *v. Ziegler*, 737 F. Supp. 3d 958, 976 (C.D. Cal. 2024), *appeal docketed* No. 25-2408  
7 (9th Cir. Apr. 15, 2025); *San Miguel v. HP Inc.*, 317 F. Supp. 3d 1075, 1086-87 (N.D.  
8 Cal. 2018).

9 In sum, Plaintiffs do not (and cannot) plead that Renaissance acted  
10 “knowingly” “without permission” in processing their data. This is unsurprising. Any  
11 attempt to allege this required element would fail because of Plaintiffs’ admission  
12 that Renaissance “relie[d] on the consent of school personnel” in processing student  
13 data. FAC ¶ 14.

14 Plaintiffs finally argue that Renaissance improperly suggests overcoming  
15 technical barriers is required to show a CDAFA violation. *See* Opp. 24-25. This  
16 misstates Renaissance’s argument—which is that Plaintiffs have not adequately  
17 alleged “access” under the statute because they do not claim “Renaissance collected  
18 data from or accessed parts of their children’s computers **outside** of Renaissance’s  
19 products.” Mot. 16 (emphasis in original); *see, e.g., Heiting*, 709 F. Supp. 3d at 1020  
20 (dismissing CDAFA claim for failure to plead “access” because plaintiff did not  
21 allege “that [d]efendant implanted anything on her computer” or otherwise “make  
22 clear how any ‘access’ took place”); *see also* Cal. Penal Code § 502(b)(1) (defining  
23 “[a]ccess” as “to gain entry to, instruct, cause input to, cause output from, cause data  
24 processing with, or communicate with, **the logical, arithmetical, or memory**  
25 **function resources of** a computer, computer system, or computer network”).

**D. Plaintiffs Fail to Plausibly Plead UCL Standing or Any of the Prongs**

Plaintiffs’ Opposition scarcely defends their UCL claim and does not rebut Renaissance’s arguments that they lack statutory standing and fail to state a claim.<sup>9</sup>

No statutory standing. Plaintiffs’ Opposition argues they have UCL standing because of alleged “unauthorized disclosure and taking of their [children’s] personal information” and resulting “diminution” in its value. FAC ¶ 428. Not so. Neither theory satisfies the UCL’s statutory standing requirement that Plaintiffs have “lost money or property as a result of the unfair competition.” *Birdsong v. Apple, Inc.*, 590 F. 3d 955, 959 (9th Cir. 2009).

Plaintiffs acknowledge that myriad courts have rejected their “unauthorized taking” theory because “disclosure of personal information alone does not constitute economic or property loss sufficient to establish UCL standing[.]” *Mastel v. Miniclip SA*, 549 F. Supp. 3d 1129, 1144 (E.D. Cal. 2021); Opp. 25; *see also* Mot. 17 (collecting cases). And Plaintiffs’ cases rely on two distinguishable decisions by the same judge, *Calhoun* and *Brown*. *Calhoun*’s UCL standing analysis relied exclusively on data breach cases which bear no resemblance to the allegations in the FAC. *Calhoun v. Google LLC*, 526 F. Supp. 3d 605, 636 (N.D. Cal. 2021). *Brown* found statutory standing existed where plaintiffs presented detailed factual allegations regarding the commercial value of their personal information, including that defendant Google itself had “previously . . . paid individuals for browsing histories.” *Brown v. Google LLC*, 2021 WL 6064009, at \*15 (N.D. Cal. Dec. 22, 2021). Allegations like these which facilitate the quantification of data’s value are absent here.

Nor do Plaintiffs credibly defend their “diminution of value” theory. They do not respond to Renaissance’s cited authority holding that plaintiffs lack UCL

---

<sup>9</sup> Plaintiffs ignore Renaissance’s argument that the FAC fails to plead a fraudulent prong claim, Mot. 18 n.8, waiving that argument.

1 standing where, as here, Plaintiffs do not “allege they ever attempted or intended to  
2 participate in [an existing] market [for their personal information], or otherwise to  
3 derive economic value from [it].” *See* Mot. 17-18; *Moore v. Centrelake Med. Grp.,*  
4 *Inc.*, 83 Cal. App. 5th 515, 538 (2022). The sole case they do cite, *Jones*, found **no**  
5 UCL standing and supports Defendant’s position. *See* Opp. 25. There, the Court  
6 dismissed plaintiff’s UCL claim for lack of statutory standing where, as here, she  
7 failed to “demonstrate[] that her data [was] economically profitable to her,” such as  
8 by alleging participation in an existing market for her information. *Jones*, 720 F.  
9 Supp. 3d at 950. Plaintiffs’ final argument contends, without caselaw support, that  
10 there is no difference between “diminishing the value” of personal information and  
11 “preventing the development of a legitimate student-data market.” Opp. 26. This is  
12 incorrect. The proper inquiry, as set out in *Moore*, is whether Plaintiffs attempted to  
13 “derive economic value from their [personally identifiable information]” through an  
14 existing market. *See* 83 Cal. App. 5th at 538-39. As above, Plaintiffs’ allegations do  
15 not (and cannot) satisfy this standard.

16 No claim under any UCL prong. Even if Plaintiffs could establish statutory  
17 standing (they cannot), their UCL claim would fail because they do not plausibly  
18 plead violation of the unlawful or unfair prongs. *See* Mot. 18. The many deficiencies  
19 with Plaintiffs’ statutory claims doom any derivative UCL unlawful prong claim,  
20 *Aleksick v. 7-Eleven, Inc.*, 205 Cal. App. 4th 1176, 1185 (2012), and Plaintiffs cannot  
21 state an unlawful prong claim based on their common law causes of action—which  
22 they effectively concede in their Opposition. *See* Opp. 26. Meanwhile, Plaintiffs’  
23 unfair prong claim “cannot survive” where, as here, “the claims under the other two  
24 prongs of the UCL do not survive.” *Hadley v. Kellogg Sales Co.*, 243 F. Supp. 3d  
25 1074, 1105 (N.D. Cal. 2017).

26 **E. Plaintiffs Fail to Plead Invasion of Privacy**

27 The Opposition fails to address—and therefore concedes—Plaintiffs’ failure  
28 to plead their intrusion upon seclusion claim and instead attempts (and fails) to amend

1 their claim in the Opposition to one of public disclosure of private facts.

2 Plaintiffs concede by failing to address that their intrusion upon seclusion  
3 claim must be dismissed for failure to allege intrusion of a physical “place.” *See* Mot.  
4 19; Opp. 26; *Jones v. Dollar Tree Stores, Inc.*, 2021 WL 6496822, at \*7 (C.D. Cal.,  
5 2021) (stating failure to address an argument raised in dismissal motion waives that  
6 argument).

7 In apparent recognition that their intrusion upon seclusion claim is fatally  
8 flawed, Plaintiffs’ Opposition improperly proposes a **brand-new claim** for public  
9 disclosure of private facts under Wis. Stat. § 995.50(2)(am)(3). *Compare* FAC ¶¶  
10 433-445 (pleading only “Intrusion Upon Seclusion”) with Opp. 26-28. In fact, the  
11 FAC only makes passing mention of the concept of public disclosure of private facts  
12 when alleging a violation of the Wisconsin wiretapping statute, not as a standalone  
13 claim. FAC ¶ 492 (alleging wiretapping through violation of “multiple laws,  
14 including, but not limited to, invasion of privacy by intrusion upon seclusion and by  
15 public disclosure of private facts (codified at Wis. Stat. § 995.50)”). But Plaintiffs  
16 cannot state new claims in an opposition brief. *Roe #1 v. United States*, 2021 WL  
17 1122441, at \*3 (E.D. Cal., 2021) (“Of course, plaintiffs may not amend their  
18 complaint by way of their opposition to the pending motion to dismiss”). The Court  
19 should not entertain this improper amendment and should dismiss Plaintiffs’ invasion  
20 of privacy claim for the reasons stated in the Motion.

21 Even if the Court were to examine this new claim, it should be dismissed  
22 because the FAC does not allege (1) Renaissance publicized Plaintiffs’ private  
23 information “to the public at large, or to so many persons that the matter must be  
24 regarded as substantially certain to become one of public knowledge,” *Hillman v.*  
25 *Columbia Cnty.*, 474 N.W.2d 913, 920 (Wis. 1991); or (2) that the ubiquitous practice  
26 of sharing user data with third-party service providers can be understood to defy  
27 “social convention and expectation[.]” so as to be “highly offensive to a reasonable  
28 person[.]” *Bogie v. Rosenberg*, 705 F.3d 603, 612 (7th Cir. 2013) (affirming

1 dismissal of invasion of privacy claim for failure to allege “highly offensive”  
2 intrusion), where the FAC concedes Renaissance acted with consent from schools,  
3 *see* FAC ¶ 14, and that Plaintiffs were on notice, *see* FAC ¶¶ 116, 137, 147.

4 **F. Plaintiffs Fail to Plead Unjust Enrichment**

5 Plaintiffs do not rebut Renaissance’s arguments why the FAC does not state a  
6 claim for unjust enrichment. **First**, Renaissance explained that Plaintiffs fail to allege  
7 it tangibly benefits from students’ disclosure of personal information through its  
8 products. Mot. 20 (citing *Giasson v. MRA Mgmt. Ass’n*, 777 F. Supp. 3d 913, 940-41  
9 (E.D. Wis. 2025)). The *Gaisson* court found that plaintiffs’ allegations that  
10 “Defendant used [their] PII/PHI to facilitate its business[,]” was too vague to plead  
11 the tangible benefit element of an unjust enrichment claim. 777 F. Supp. at 939.  
12 Plaintiffs’ refrain that Renaissance benefits from “monetizing” student data because  
13 that data is its “core business model”—without identifying (because it cannot) any  
14 mechanism of monetization—goes no farther than the pleading in *Giasson*. *See* Opp.  
15 29. Thus, the Opposition fails to demonstrate that Renaissance obtained a tangible  
16 benefit as required for unjust enrichment.

17 **Second**, Plaintiffs fail to respond to Renaissance’s argument that they have no  
18 intellectual property right in the disputed data, effectively conceding that they cannot  
19 plead an unjust enrichment claim under Wisconsin law. *See* Mot. 20. Even if student  
20 data were somehow “unwillingly” provided, Opp. 29, it still would not support an  
21 unjust enrichment claim where Plaintiffs have no property right at stake.

22 **Third**, Plaintiffs do not (and cannot) plead that their children provided  
23 information to Renaissance while receiving nothing in return—as required to state an  
24 unjust enrichment claim. *See T&M Farms v. CNH Indus. Am., LLC*, 488 F. Supp. 3d  
25 756, 769 (E.D. Wis. 2020). Instead, the FAC plainly alleges that Plaintiffs’ children  
26 received the benefit of using Renaissance’s educational products. *See* Mot. 21. Thus,  
27 Plaintiffs are limited only to their available legal remedies. *See T&M Farms*, 488 F.  
28 Supp. 3d at 769 (“It is not unjust to limit disappointed product purchasers to their

1 legal remedies.”). Plaintiffs contend (without supporting authority) that students’  
2 constitutional right to a public-school education means that they do not receive  
3 benefit from educational products their schools provide. *See* Opp. 30. However,  
4 Plaintiffs’ own authority illustrates that right does extend so far. *See Bd. of Ed. v.*  
5 *Sinclair*, 222 N.W.2d 143, 145 (Wis. 1974) (concluding that some educational tools  
6 fall outside the “free” public education provision of the Wisconsin constitution). The  
7 FAC’s allegations demonstrate that Renaissance’s products are optional instructional  
8 tools which benefit Plaintiffs’ children—defeating Plaintiffs’ unjust enrichment  
9 claim.

### 10 **G. Plaintiffs Fail to State a Negligence Claim**

11 Plaintiffs’ Opposition does not meaningfully refute Renaissance’s showing  
12 that Plaintiffs have not stated a classic negligence or a negligence *per se* claim.

13 Classic Negligence. Plaintiffs’ classic negligence theory fails because there is  
14 (1) no foreseeable harm, (2) a public policy against imposing liability here,  
15 (3) intervening causation, and (4) no damages. Mot. 21-23. **First**, Plaintiffs  
16 misconstrue Renaissance’s argument regarding foreseeability, arguing that  
17 “Wisconsin law does not require foreseeability of a lawsuit.” Opp. 31. But  
18 Renaissance’s argument is not that Plaintiffs’ *lawsuit* was unforeseeable. Rather, the  
19 Motion argues when a rule that exists to prevent harm—here, longstanding FTC  
20 guidance—is followed, risk of *harm* is not reasonably foreseeable. *See Mitchell v.*  
21 *Hess*, 2010 WL 1212080, at \*5 (E.D. Wis. Mar. 23, 2010).

22 **Second**, Plaintiffs fail to rebut Renaissance’s argument that allowing their  
23 claim to proceed “would open up the possibility that no sensible or just stopping point  
24 exists.” *See* Mot. 22 (citing *Pelnar v. Rosen Sys., Inc.*, 964 F. Supp. 1277, 1284 (E.D.  
25 Wis. 1997). Despite Plaintiffs’ insistence to the contrary, Opp. 31-32, the policy  
26 ideals articulated in *Pelnar* are equally applicable to Plaintiffs’ negligence claim  
27 against Renaissance. The FAC itself, ¶¶ 46, 240, underscores that their requested  
28 relief would disrupt the edtech industry and create immediate and lasting impacts on

1 the education system—precisely the limitless liability Wisconsin law seeks to avoid.

2 **Third**, the Opposition contends that there is no intervening causation because  
3 Plaintiffs complain of **Renaissance’s** collection of data, not downstream misusers of  
4 the data. *See* Opp. 32. But Plaintiffs do not (and cannot) allege any actionable harm  
5 from Renaissance’s receipt of data they voluntarily input into its products. The  
6 supposed harm, then, depends on the intervening actions of putative third parties,  
7 severing any causal link between Renaissance’s supposed negligence and Plaintiffs’  
8 alleged damages.

9 **Fourth**, unable to substantiate any legitimate negligence damages, Plaintiffs  
10 instead muddle state law claims, distort the pleading standard, and fabricate an  
11 unfounded basis for recovery. To state a negligence claim under Wisconsin law,  
12 Plaintiffs must allege a “harm that has already occurred or is ‘reasonably certain’ to  
13 occur in the future.” *Reetz v. Advoc. Aurora Health, Inc.*, 983 N.W.2d 669, 677 (Wis.  
14 Ct. App. 2022). Plaintiffs argue they plead “harms” of “privacy violations,  
15 diminution of the value of their personal information, and forced participation in the  
16 data market,” Opp. 33, but those are not cognizable negligence damages under  
17 Wisconsin law.

18 In support of their claim for “privacy violations” as negligence damages,  
19 Plaintiffs conflate state law torts, citing only the statute for the **intentional** tort of  
20 invasion of privacy. *See* Wis. Stat. § 995.50; Wis. Stat. § 893.57 (categorizing  
21 invasion of privacy as an intentional tort); *see also* *Fox v. Iowa Health Sys.*, 399 F.  
22 Supp. 3d 780, 796-67 (W.D. Wis. 2019) (dismissing invasion of privacy claim based  
23 on alleged negligent or reckless disclosures). A separate intentional tort is not a  
24 category of negligence damages.

25 Wisconsin law also forecloses Plaintiffs’ baseless diminution of value theory.  
26 *See Giasson*, 777 F. Supp. 3d at 929 (diminution not cognizable because plaintiff did  
27 not explain how dark web exposure reduced her data’s value or that she intended to  
28 sell it). Here too, Plaintiffs fail to allege how their data’s value was diminished, or

1 how they were excluded from a data market. Mot. 22. Without a different non-  
2 speculative injury, Plaintiffs’ allegations fall short.

3 Plaintiffs’ reliance on *Fox*—which they cite out of context to assert that  
4 pleading negligence requires only an injury sufficient for Article III standing—is  
5 unavailing. *See* Opp. 32-33. There, the court found the plaintiff had indeed alleged  
6 “*measurable, pecuniary damages* that they suffered as a result of the data breaches.”  
7 *Fox*, 399 F. Supp. 3d at 795. The same cannot be said for Plaintiffs.

8 Finally, contrary to Plaintiffs’ assertion, Opp. 33, Wisconsin law does not  
9 permit recovery for unjust enrichment on a negligence claim, and the only authority  
10 Plaintiffs cite for their proposition is the invasion of privacy statute, which does not  
11 apply. *See id.* (citing Wis. Stat. § 995.50(4)). Ultimately, Plaintiffs’ alleged harms do  
12 not meet the standard to state a claim for negligence damages.

13 Negligence Per Se. Plaintiffs offer no meaningful response on negligence *per*  
14 *se*. Although they argue that COPPA can provide a basis for recovery despite its lack  
15 of a private right of action, Plaintiffs present supporting authority. *See* Opp. 33.  
16 Neither does *Dusterhoft* aid Plaintiffs, as that court never resolved whether HIPAA  
17 violations could substantiate a claim for negligence *per se*. *See Dusterhoft v.*  
18 *OneTouchPoint Corp.*, 2024 WL 4263762, at \*12 (E.D. Wis. Sep. 23, 2024) (finding  
19 that neither party had adequately briefed this issue). The Opposition also ignores  
20 Renaissance’s argument that COPPA is a general regulatory statute, which cannot  
21 support negligence *per se* under Wisconsin law. *See Cooper v. Eagle River Mem’l*  
22 *Hosp., Inc.*, 270 F.3d 456, 460 (7th Cir. 2001).

#### 23 **H. Plaintiffs Fail to Plead a WDTA Claim**

24 Plaintiffs’ Opposition does nothing to save their WDTA claim, requiring  
25 dismissal. *See* Mot. 24-25. **First**, Plaintiffs fail to address authority limiting the  
26 WDTA to Wisconsin residents. *See* Opp. 34 (failing to address *Hydraulics*  
27 *International, Inc. v. Amalga Composites, Inc.*, 2022 WL 4273475, at \*10 (E.D. Wis.  
28 Sep. 15, 2022)). Finding the statute’s relevant language ambiguous, the *Hydraulics*

1 court closely examined its legislative purpose: to “protect[] its own residents and not  
2 with subjecting its citizens and businesses to liability for the sake of protecting  
3 residents of other states.” *Id.* at \*8. To read it otherwise, the court stated, “would  
4 dramatically expand the scope of the statute beyond what courts have said is its  
5 primary purpose—protecting Wisconsin consumers.” *Id.*; *see also id.* at 9 (explicitly  
6 rejecting the contrary finding in *Le v. Kohls Department Stores, Inc.*, 160 F. Supp.  
7 3d 1096, 1115 (E.D. Wis. 2016), cited by Plaintiffs). The only other case Plaintiffs  
8 cite is distinguishable from *Hydraulics*, where, as here, **only out-of-state plaintiffs**  
9 brought suit against an in-state business. *Cf. State v. Talyansky*, 995 N.W.2d 277, 283  
10 (Wis. Ct. App. 2023) (reversing ruling that prohibited state from introducing  
11 evidence regarding out-of-state (as well as in-state) consumers).

12 **Second**, Plaintiffs argue the WDTPA does not require them to have entered  
13 into a commercial transaction, yet the cases they cite all involve one. *See Opp.* 34  
14 (citing *Slane v. Emoto*, 582 F. Supp. 2d 1067, 1083 (W.D. Wis. 2008); *Thermal*  
15 *Design, Inc. v. Am. Soc’y of Heating, Refrigerating & Air-Conditioning Eng’rs, Inc.*,  
16 755 F.3d 832, 837 (7th Cir. 2014)). The case law is clear that “section 100.18 applies  
17 by its terms to *commercial transactions*.” *Thermal Design*, 755 F.3d at 838 (emphasis  
18 in original).

19 **Third**, the claim must be dismissed because Plaintiffs fail to plead they relied  
20 on Renaissance’s statements. A WDTPA claim requires that “defendants made the  
21 representation with intent to defraud and to **induce plaintiff to act** upon it; and . . .  
22 **plaintiff** believed the statement to be true and **relied on it** to his detriment.” *Slane*,  
23 582 F. Supp. 2d at 1079. Plaintiffs do not allege that **they** (as opposed to schools)  
24 relied on Renaissance’s statements. FAC ¶ 513 (alleging only that “Plaintiffs’ . . .  
25 school districts” relied on Renaissance’s representations in purchasing products).  
26 This failure to plead a causal link between Renaissance’s alleged misrepresentations  
27 and any pecuniary loss to Plaintiffs is fatal to their claim. *See Dusterhoft*, 2024 WL  
28 4263762, at \*16.

1 *Finally*, Plaintiffs have not alleged a pecuniary loss from Renaissance’s  
2 alleged conduct. *See supra* § II.C.

3 **I. The Court Should Dismiss Without Leave to Amend**

4 Dismissal should be with prejudice, as Plaintiffs had two opportunities to plead  
5 their claims, which remain deficient. *See Cervantes v. Countrywide Home Loans,*  
6 *Inc.*, 656 F.3d 1034, 1042 (9th Cir. 2011) (affirming dismissal without leave to amend  
7 where “none of the new allegations cure[d] . . . deficiencies”).

8 **III. CONCLUSION**

9 For the foregoing reasons, the Court should dismiss the FAC with prejudice.
